

DANIEL DAZONG

AI Solutions Engineer | AI Automation Engineer | AI Agents & Workflow Automation | LLM Systems

NC 27106 | dazong.daniel@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | 743-444-1871

PROFESSIONAL SUMMARY

AI Solutions Engineer with 7+ years of experience spanning IT operations, cloud security, automation, and AI-driven systems. Specializes in designing AI agents, workflow automations, and retrieval-based solutions that improve operational efficiency and business decision-making. Experienced in leveraging Python, OpenAI, LangChain, APIs, n8n, and cloud technologies to deliver scalable AI-powered solutions.

EXPERIENCE

FOUNDER & AI SOLUTIONS ENGINEER

SkywaveHost (May 2024 - Present)

- Designed and delivered AI agents, workflow automations, and internal tools that reduced manual operational effort by 65%+.
- Built 15+ end-to-end automation solutions using n8n, LLMs, APIs, databases, and business applications to streamline intake, decision-making, routing, and customer communication workflows.
- Developed multiple RAG-based AI assistants leveraging organizational knowledge to improve response accuracy and information accessibility.
- Improved system performance through prompt engineering, retrieval optimization, testing, and continuous workflow refinement.
- Partnered with business stakeholders to translate operational challenges into scalable AI and automation solutions that delivered measurable efficiency gains.

CYBERSECURITY ENGINEER

CosmoPortals Technologies Solutions, LLC (Feb 2023 - May 2024)

- Supported secure cloud infrastructure and production systems with a focus on availability, access control, and security best practices.
- Managed IAM processes, including access provisioning, permission management, and least-privilege enforcement.
- Utilized Microsoft Sentinel and Defender for Cloud for security monitoring, alert triage, and incident investigation.
- Improved cloud security posture through configuration reviews, access control enhancements, and operational security improvements.

IT SPECIALIST

Peter and Jane Limited (Aug 2020 - Sep 2022)

- Supported enterprise systems, business applications, and IT infrastructure to maintain operational reliability and business continuity.
- Resolved hardware, software, network, and system issues while improving service availability and reducing operational downtime.
- Administered and maintained workplace technology, user environments, and business-critical applications across the organization.
- Partnered with business and technical teams to streamline processes, improve system performance, and enhance overall operational efficiency.

TECHNICAL SKILLS

- **AI & LLM Systems:** AI Agents, Retrieval-Augmented Generation (RAG), Vector Databases, Prompt Engineering, Conversational AI, LLM Applications, Evaluation Frameworks, Agentic Workflows
- **Automation & Orchestration:** n8n, Zapier, Make, Workflow Automation, Process Design
- **Programming & Integration:** Python, REST APIs, LangChain, System Integration, API Integration
- **Cloud & Security:** Microsoft Sentinel, Cloud Infrastructure, IAM, RBAC, Security Monitoring
- **AI Platforms:** OpenAI, Gemini, Microsoft Copilot, Relevance AI, Cursor

RECENT AI / AUTOMATION PROJECTS

AI-Powered Customer Order Management Automation System

Technologies: *n8n, OpenAI, Airtable, Gmail API*

- Built an AI-driven order lifecycle automation system that manages confirmation, shipping, and delivery communications.
- Integrated OpenAI to generate personalized customer emails based on real-time order status updates.
- Implemented workflow logic, duplicate-prevention controls, and automated record synchronization.
- Reduced manual customer communication processes through end-to-end automation.

AI-Powered Customer Support Knowledge Assistant (RAG)

Technologies: *OpenAI, Vector Database, RAG Architecture, n8n*

- Developed a Retrieval-Augmented Generation (RAG) assistant for answering customer inquiries using company knowledge sources.
- Implemented semantic search and document retrieval to improve response accuracy and reduce hallucinations.
- Automated support request classification and routing for complex customer issues.
- Designed scalable conversational workflows for self-service customer support.
- Improved access to organizational knowledge and reduced repetitive support inquiries.

AI-Powered Voice Customer Service & Appointment Agent

Technologies: *Voice AI, OpenAI, Calendar APIs, Workflow Automation*

- Built a conversational AI voice agent capable of handling customer inquiries and appointment scheduling.
- Integrated calendar systems for real-time availability checks and automated bookings.
- Automated customer confirmations and internal notification workflows.
- Designed a reusable architecture for deployment across service-based businesses.
- Enabled automated appointment scheduling and customer engagement without manual intervention.

AI Document Processing & Data Extraction System

Technologies: *OpenAI, OCR, Python, n8n*

- Built an AI-powered document processing workflow that extracts, classifies, and validates information from invoices, forms, and business documents.
- Automated structured data entry into business systems using LLMs and workflow automation.
- Reduced manual document processing effort and improved data accuracy.

EDUCATION

- Professional Certificate Course - **AI Engineering** | ZTM | 2025
- Master of Science (MS) - **Cybersecurity & AI Engineering** | University of the Cumberlands | 2024 - 2026 (In Progress)
- Master of Science (MS) - **Data Science** | Carolina University | 2022-2023 (Transferred)
- Bachelor of Science (BS) - **Computer Engineering** | ISM Adonai University | 2016-2019
- Associate of Science (AS) - **Mechanical Engineering** | Air Force Institute of Technology | 2014-2016
