SUMMARY

2+ years building AI agents, RAG assistants, and n8n workflows that take repetitive work off operations and customer support teams. Brings 3+ years of software engineering, cloud security, and IT experience, including Django, IAM, and security monitoring.

EXPERIENCE

AI Solutions Engineer

Jun 2024 – Present

Nouvrix

- Cut manual operational effort by 65%+ by building 15+ AI agents, RAG assistants, and n8n workflows that automate intake, routing, decisions, and customer communication.
- Integrated LLMs with REST APIs, databases, and business applications so workflows read, update, and act on live company data.
- Worked with business teams to map manual processes and scope each automation, then tuned prompts, retrieval, and workflow logic after launch to improve accuracy.

Cloud Security Engineer

Feb 2023 – May 2024

CosmoPortals Technologies Solutions, LLC

- Managed IAM for cloud infrastructure and production systems, including access provisioning, permission management, and least-privilege enforcement.
- Triaged security alerts and investigated incidents using Microsoft Sentinel and Defender for Cloud.

Software Engineer (Work-Study)

Sep 2022 – Feb 2023

Carolina University

- Built the university's job application platform, where students browse open campus positions and apply online.
- Developed the full stack in Python/Django, HTML, CSS, and JavaScript, from data models to front-end pages.

IT Specialist

Aug 2020 – Sep 2022

Peter and Jane Limited

- Maintained enterprise systems and IT infrastructure, resolving hardware, software, and network issues to keep downtime low.

PROJECTS

AI Order Management Automation | n8n, OpenAI, Airtable, Gmail API

- Automated the full order lifecycle, sending confirmation, shipping, and delivery emails that OpenAI personalizes from each order's real-time status.
- Built duplicate-prevention checks and automatic Airtable record sync to stop repeat or outdated customer emails.

Customer Support Knowledge Assistant (RAG) | OpenAI, vector database, n8n

- Answers customer questions from company knowledge sources, using semantic search to ground each response in retrieved documents and reduce hallucinations.
- Classifies incoming support requests and routes complex issues for escalation.

SKILLS

AI & LLM: AI Agents, RAG, Prompt Engineering, Vector Databases, LangChain, OpenAI, Gemini, Microsoft Copilot, Relevance AI

Automation: n8n, Zapier, Make, Airtable

Programming: Python, Django, JavaScript, HTML/CSS, REST APIs, Gmail API, Cursor

Cloud & Security: Microsoft Sentinel, Defender for Cloud, IAM, RBAC

EDUCATION

Western Governors University

Master of Science (MS), Computer Science

Mar 2025 – Apr 2027 (Expected)

ISM Adonai University

Bachelor of Science (BS), Computer Engineering

Oct 2016 – Sep 2019

Air Force Institute of Technology

Associate Degree, Mechanical Engineering

Aug 2014 – Sep 2016

CERTIFICATIONS

Azure AI Apps and Agents Developer Associate (AI-103) | Microsoft

In Progress

Professional Certificate, AI Engineering | ZTM

2025

Azure Fundamentals (AZ-900) | Microsoft

2024
